## Progress so far

### Joshua

- Shows off current version of app (Looks good)
- Added major UI overhauls

### Michael

- Shows off app (Looks alright)
- Challenges: Takes 10 mins to build/run
- Made iOS branch
- Made a basic tabbed app with desired layout
- Basic attempt at survey

### David

- Tried to make more accurate time picker. Settled on user typing minutes.

## Mentor Meeting was Discussed

Summarised what was said in the meeting to Joshua.

Discussed sprint 3. We need to make documents for sprint 3:

- Installation guide
- User guide

- Acceptance tests
- Additional features
- Client retrospective
- Internal group retrospective
- Analysis of time spent over the project

## **Plans for next week**

### **Joshua**

- Add third page of sleep diary
- Add secondary information as an optional pop-up

### **Michael**

- Meeting with Taige to code together
- Fully implement survey
- Show off sleep record

### **David**

- Use email identification for the user
- Complete the settings page
- Minor improvements to the app
