

## **Welcome**

Auditor Meeting - 17 October Location - Clough Centre Meeting Start: 3:07pm  
Meeting Ended: 3:36pm

Attendees: Syed - Auditor, Taige - Team leader, Michael, Zi Hao, Joshua, David

Apologies: Adam

## **Introduction**

Android is progressing, but has some bugs.

iOS is having major issues.

Website is progressing very well.

## **What each team member did last week**

### **Michael**

Worked on the survey for iOS.

- Implemented all questions
- Correct answer formats
- Started implementing JSON object conversion

### **David**

Worked on documentation for client.

Made changes client wanted:

- Made picker for the website more accurate (to the minute)
- PWA works

### **Taige**

Worked on the non-linear survey.

## **Zihao**

Work on HTTP protocols and found mild success, but only works on the debugger so far.

Thinks he can finish the app by the due date of sprint 3.

## **Joshua**

Finished the visual side of the questionnaire.

- Extra info text implemented

No backend validation though.

## **Discussed iOS**

Major problems with ResearchKit.

Lack of time to finish the other features.

We will present the PWA to the client instead, but will aim to finish the survey module.

## **Discussed issues with contacting client**

Away until 22nd October (when sprint 2 is due).

Unit Coordinator said all work must be submitted by Monday night.

## **Plan of action to wrap up sprint 3**

David is willing to finish the documentation of the app. Wants us to proof-read his work though.

Time analysis will be done individually and compiled into a single document.

## **Action items**

David will list all the documentation to be done specifically.
