Group Meeting
7th Sept 3:16pm UWA Makers Club G Computer Lab
Team R

Attendees
David - Team Leader
Michael
Joshua
Zi Hao
Taige - Scribe

Apologies
Adam

Details
Subgroup Report
 Michael
 -Working with Laravel
   -encountered a lot of problems setting up the program
   -problems with port numbers (remote)
 -Tried V Host
   -Recommended
   -David mentioned it is too technical

 -To do: get Laravel working
   -Time: <4hrs

 Adam
 -Absent

 Joshua
 -App took overnight to DL
 -Didn't compile
   -For the emulator failed to compile
 -Need to meet up
 -UI: mentioned in mentor meeting
   -UWA style
 -Can make a list of improvements(?) UI-wise for the heroku website

 -To do:
   -Push issues to Github
   -Meet with ZiHao for problems

 ZiHao
 -Working on adding questions questionnaires
   -Question is getting very large
   -Looks very ugly
   -Solution:
     -Change the whole layout of the app
     -Major changes
 -Question dependency
   -
 -Question help?
   -Refer to research paper?
 -Long questions
   -Split into sections, so not all cluttered and also easier to validate and also easier
   for user
 -Layout
   -May take time, need to collaborate with Joshua to ease workload.
   -Not too difficult, but very time consuming (UI and layout wise)

To do:
-Can complete login page and questionnaire
-Work on app so it will be more like the website.

Taige
-Encountered problem maintaining versions when working with app versions with Adam.
-Will try to solve this with Adam. David may help out too.

-To do:
-To cover SWIFT basics
-To resolve Github version problems.

David
-Mentions that this project might pull too much time from our studies.
-Overestimation of capabilities are bad
-The website is now able to DL sleep data
-Need to work with iOS and Android app devs regarding data format and communication
-Use Networks tab regarding requests and responses, and try to copy the format
-Authentication:
-JSON web tokens
-Received from logging in
-how to validate each CALL
-Must send token string to validate
-Use postman to test
-David plans to be present in each subgroup meeting to help out
-To Do:
-liaise with the client to get a handle to see where the app is going
-Changes on the website, will need to be manually pushed onto the server, and decides if David decides to deploy it
-Uses dev ops
-Iterates the importance of communication and also asking around instead of building something from scratch

Meeting adjourned 4:00pm
