Mentor Meeting
Sleep Science Boardroom G04
Team R
12/9 2:08pm Start

Attendees
Jennifer - Client
David - Team Leader
Michael
Zi Hao
Joshua
Taige

Apologies
Adam

Details
Data gathered from a launched UI from a British company (CRF?)
     UI
          -Usage of a visual analogue for some questions
          -Usage if a select button for entering time.
               -Time cannot be entered via keypad.
          -Julie is seeking something similar for SS.
          -Issue of copyright?
          -We requested Julie to send photos of the UI for starting ideas

User testing
     -Won't test on actual participants due to ethical reasons
          -Will test on someone what will mirror the audience
          -We an implement this when we're ready
               -Link will be shared with Jen
     -App to test will be sent out in the next two weeks

App (website)
     FEEDBACK
          -Not UWA Colours? (Not a big issue)
               -May change due to UWA
               -Jen will leave this to our discretion
          -Login
               -Don't go with identification
               -Account retrieval
                    -Email okay
               -Data that cannot be stored
                    -Anything else
                        -Names
                    -Prevention against DB leaks
               -Clinicians
                    -Not deidentified
               -Researchers
                    -Not deidentified
          -Regarding times past midnight
               -Jen is fine with current layout
               -Time start at midday to midday the next day
                    -Similar to Doodle
               -Maybe a checkbox that says past midnight?
               -Could include a prompt to indicate that it can be entered via keyboard
          -Default browser challenges
               -David will figure something out
          -Android times
               -Jen said that its fine

-
-Data DL
     -System dependent
     -Excel Sheet
          -Data presentation
               -Bar graphs of sleep times?
               -Line on sleep and wake times?
-Jen is fine with everything else
     -Go with current setup and see how it goes with testing

ID at sleep science
     -Each trial patient number is different for each trial
          -Each trial starts at 1
               -Hard to track specific patients
                    -Can be tracked via date filters

Sprint 2
     -Do we need to send the app to you by then (Monday Week) or do we also require feedback?
          -Will have to send beforehand?
     -Jen will send feedback
     -Michael will check with unit coordinator
          -Jen happy to use this meeting as feedback

Meeting Adjourned 2:53pm
